Remarques générales

- Les données présentées dans ce document reposent sur l'exploitation des résumés de passage aux urgences (RPU) transmis sur le concentrateur régional par les établissements de santé disposant d'une structure d'urgences (SU) générales, adultes et/ou pédiatriques.

L'arrêté du 24 juillet 2013 précise : " les établissements de santé publics et privés ayant une activité autorisée en médecine d'urgence produisent et traitent des données d'activité médicale ".
À titre dérogatoire ou expérimental, une Agence Régionale de Santé peut autoriser la transmission des RPU d'un autre service d'un établissement autorisé à l'activité des urgences (antennes détachées des urgences, urgences gynécologiques, neuro-sensorielles, cardiologiques etc.).

- Le premier onglet "Nombre journalier de passages" présente le nombre journalier de passages totaux la semaine précédente, par SU et au total dans la région.
- Le deuxième onglet "Durées de passage" présente les durées moyennes journalières de passage, par SU (quand les données d'horodatage sont considérées comme fiables) et au total dans la région.
- Les onglets suivants présentent pour 3 niveaux : région des Pays de la Loire, départements, SU, le nombre hebdomadaire moyen de passages en 2026, 2025 et en moyenne pour les années 2018-2019.
Une déclinaison des résultats par tranche d'âge est réalisée (moins de 5 ans, 5-17 ans, 18-74 ans, 75 ans et plus).
- À noter que chaque jour, les établissements transmettent sur le concentrateur régional un fichier de RPU correspondant aux passages des 7 derniers jours. Pendant une semaine, les RPU d'une journée donnée se consolident donc progressivement avec de nouvelles informations codées a posteriori. Les données de l'année en cours sont provisoires. Elles font l'objet d'une vérification et d'une consolidation en début d'année n+1.
- Pour le CHU de Nantes et le CH de Laval, les données des années 2018-2019 et 2025-2026 ne sont pas strictement comparables. Les données 2018 et 2019 comprennent en effet les RPU pour des passages aux urgences gynécologiques, et pas les données 2025 et 2026.
- Il s'agit de données "brutes" : aucun redressement statistique, visant à s'assurer que ces données partielles soient représentatives de l'activité de l'ensemble des établissements et passages aux urgences de la région, n'a été effectué.
- En cas de problème de remontée des RPU, une note est indiquée sur les graphiques.

Précision sur l'interprétation des indicateurs

Numéro de semaine : il s'agit du numéro de semaine calendaire, chaque semaine commençant par un lundi et finissant par un dimanche.
Pour l'année 2026, la semaine 1 correspond à la période allant du lundi 29 décembre 2025 au dimanche 4 janvier 2026.

Service d'urgences du CH de Saint-Nazaire

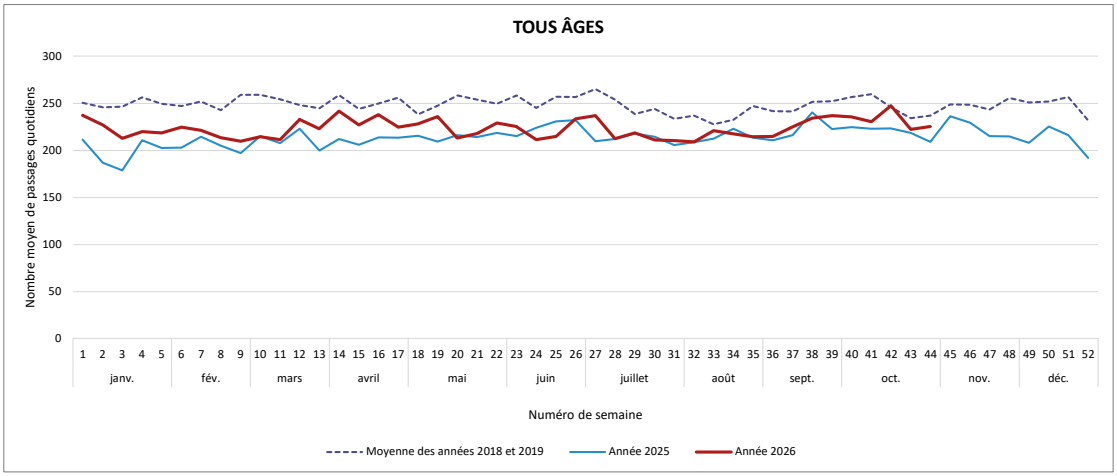

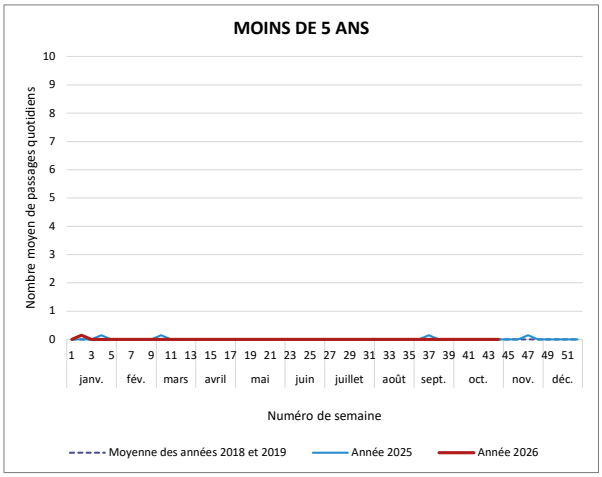

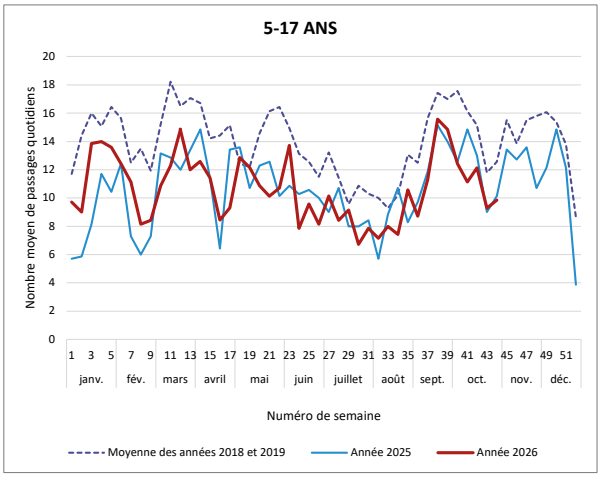

Service d'urgences adultes du CHU de Nantes

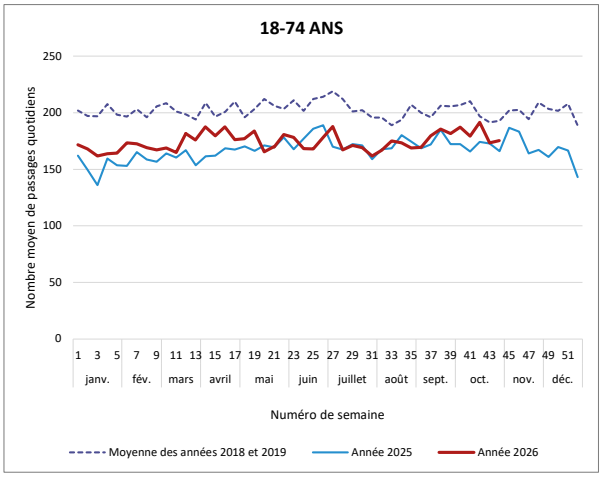

La distinction entre les RPU des services d'urgences adultes, pédiatriques et gynécologiques n'a été possible qu'à partir de janvier 2021 suite à la mise en place d'un nouveau mode de transmission.

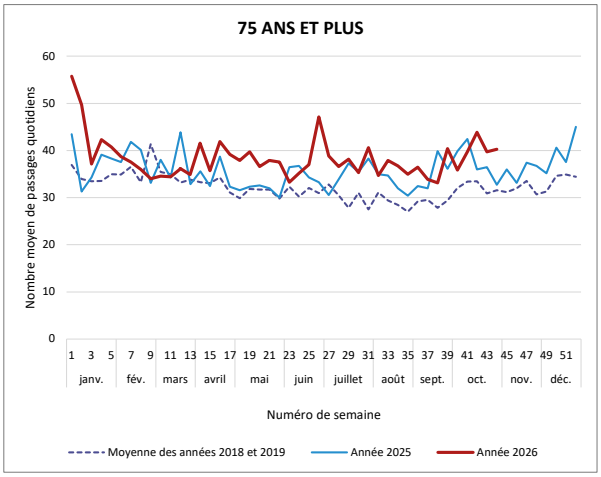

En 2018-2019, les données du service d'urgences adultes correspondent aux RPU des patients âgés de 15 ans ou plus (urgences gynécologiques comprises). Les données des années 2018-2019 ne sont donc pas strictement comparables à 2023 et 2024.

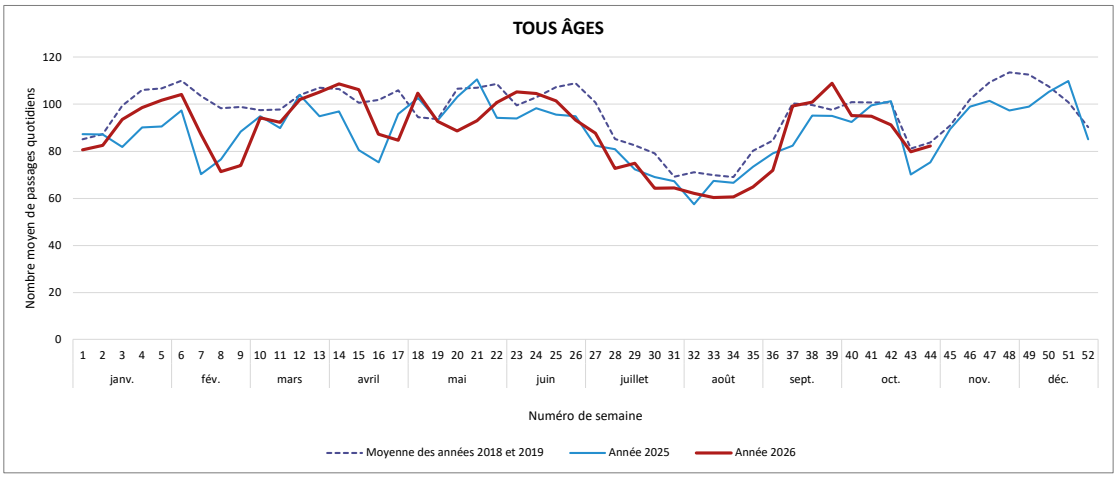

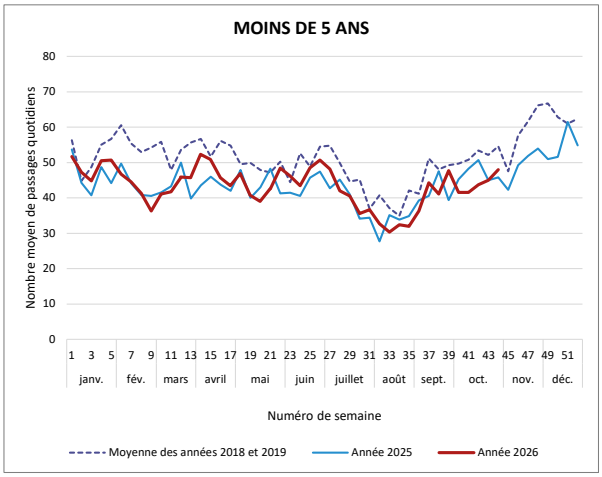

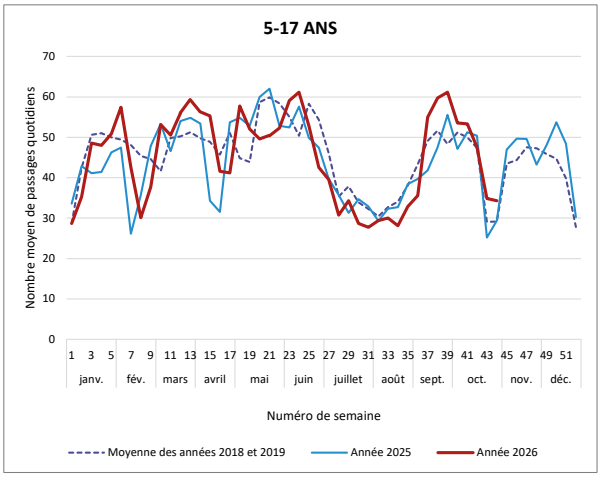

Service d'urgences pédiatriques du CHU de Nantes

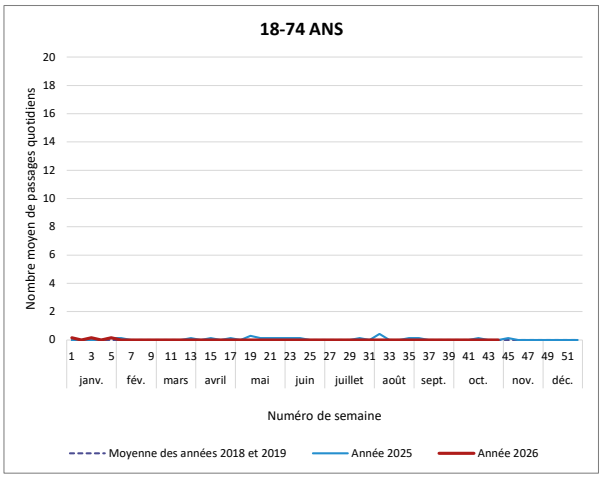

L'activité des SU pédiatriques est très fortement lié au calendrier des vacances scolaires, lui-même variable d'une année sur l'autre.
